Re: McKesson Chemical Company  
Hummelstown Facility  
I.D. No. PAD 014231005

Dear Sir:

McKesson Chemical Company has reassessed its position relative to the permitting of the reference facility for the storage of hazardous waste, and has concluded in light of the low level of anticipated business in spent solvent recycling combined with the increased burden of regulatory and liability considerations, not to pursue the Part B application now under review in your office.

Because this facility holds interim status, a formal closure will be involved.

This facility does wish, however, to maintain its status as a generator and transporter of hazardous waste, and therefore will retain its I.D. Number.

Your group's effort in McKesson's behalf over the past almost three years is appreciated.

Sincerely,

Donald M. Black  
Regulatory Compliance Manager

DMG/jl
